ABOUT ME

Motivated Information Technology undergraduate with **6 months of hands-on work experience** in full-stack web development, particularly using the MERN stack (MongoDB, Express.js, React.js, and Node.js). Gained practical industry experience working on real-world web applications and collaborative development environments. Experienced in developing scalable and user-friendly web systems, including ERP systems, e-commerce platforms, and management systems. Passionate about learning modern technologies, solving real-world problems through software, and continuously improving development skills. Seeking opportunities to further enhance my technical expertise and contribute effectively to innovative software projects.

WORK EXPERIENCE

CeylonX corporation | Jan 2026 - Jun 2026

Intern full stack developer

- Worked on major projects such as Celcius and Sparkle, contributing to both frontend and backend development using MERN stack (MongoDB, Express.js, React.js, Node.js)..
 - Developed and improved responsive user interfaces using React.js and modern CSS frameworks.
 - Implemented RESTful APIs and backend functionalities using Node.js and Express.js.
 - Integrated frontend components with backend services and managed database operations using MongoDB.
 - Participated in debugging, testing, and optimizing application performance.
 - Collaborated with the development team using Git/GitHub for version control and project management.
 - Assisted in implementing new features and resolving technical issues in ongoing projects.
-

EDUCATION

BSc. Special (Hons) in Information Technology Oct 2022 - Present

Sri Lanka Institute of Information Technology

- Specialization in Information Technology

G.C.E. Advanced Level – Art Stream

2019-2021

T/Mahadiwulwewa National School

Other stream : ICT,ECONOMICS,MUSIC

SKILLS

- **Programming Languages:** (Java, JavaScript, PHP), Frontend Frameworks (React, Next.js), Backend Frameworks (Express.js, Spring Boot), Package Managers (Node.js), Databases (MongoDB, MySQL), CMS (Strapi), Styling Frameworks (Tailwind CSS, Bootstrap), Mobile Applications (Kotlin, React Native)
 - **Tools:** Git/GitHub, VS code, Android Studio, Figma, IntelliJ
-

PROJECTS

Sparkle | Real world ERP system using MERN Stack

May 2026 - Jun2026

A real-world Enterprise Resource Planning (ERP) system developed to streamline and manage multiple business operations within a single platform. The system includes modules such as inventory management, sales management, staff management, and supply management to improve operational efficiency and data management. Built using the MERN stack (MongoDB, Express.js, React.js, Node.js), the application provides a responsive user interface, secure backend APIs, and efficient database handling. Contributed to developing core features, integrating frontend components with backend services, and implementing dynamic data management functionalities.

CeylonX Corporation | Official Company Website

Jan 2026 - Jul 2026

Designed and developed the official corporate website to enhance the company's digital presence and user engagement. By leveraging Next.js for Server-Side Rendering (SSR) and Static Site Generation (SSG), I optimized the platform for superior SEO performance and fast page load speeds. The project featured a modern, fully responsive UI built with Tailwind CSS, ensuring a seamless user experience across all devices. Additionally, I integrated a headless CMS to facilitate efficient and dynamic content management.

3S Fabrications | Real world Fabrication & Business Management System

Jan 2026 - Jul 2026

A comprehensive Fabrication Management System developed to streamline and manage day-to-day operations within a fabrication business. The system includes modules such as customer management, quotation management, job order tracking, inventory management, supplier management, employee management, and invoice generation to improve operational efficiency and workflow management. Built using the MERN stack (MySQL, Express.js, React.js, Node.js), the application provides a responsive user interface, secure backend APIs, and efficient database management. Contributed to developing core business modules, integrating frontend components with backend services, and implementing dynamic data management functionalities.

Online Computer Store - E commerce platform using MERN Stack

Feb 2024 - May 2024

This project is developed for an online computer store to simplify and improve its operations. Built using the MERN stack, the system manages inventory, customer quotations, and orders efficiently. It was designed based on the client's requirements to ensure a userfriendly and scalable solution, with version control used throughout for effective collaboration.

This project is a skill-sharing platform designed to connect learners and mentors in an interactive online community. Built with Spring Boot for robust backend services and React.js for a dynamic frontend, the platform enables users to share knowledge, book sessions, and track progress efficiently.

Magic book - Online Book Store using HTML, CSS, JS, PHP

jan 2025 - May 2025

Developed 'Magic book,' a comprehensive online bookstore platform designed to provide a seamless digital shopping experience. The system features a dynamic frontend built with HTML, CSS, and JavaScript, supported by a PHP backend to manage core functionalities such as user authentication, a searchable book catalog, and a shopping cart system. The project utilized a MySQL database for efficient data management, ensuring a smooth and reliable user flow from browsing to checkout.
